

The Next Generation of LACT Design Is Now.

THE PAST

THE FUTURE

Same Conditions
Over 60% Smaller Footprint

Power Service, A DNOW Company, is proud to introduce a brand new LACT designed saving you space, time, and money.

This new layout comes with a smaller footprint but with the same output as previous designs. It drastically reduces cost to comparative designs while reducing maintenance and trucking costs.

ON TIME

- All major materials in stock to fabricate our standard LACT, in multiple locations in addition to manufacturer inventory commitments.
- Lead Time 8 weeks ARO on the first unit.
- Order 10+ comes with a free rental before first unit arrives.

ON SCOPE

- Additional warranty terms: 18-24 commitment from all major brands if built and commissioned by Power Service.
- Fabrication facility and LACT design allows for multiple quantities without re-engineering. Consistent, Repeatable, Quality.
- Full factory acceptance test completed on every unit.
- Field support for programming/mechanical needs.
- Turn-key unit, with choice of flow computer.
- Revolutionized overhead crane for removal of equipment, no hatches in walls or roofs.
- Remote programming capability with "Tech in a Box"

BELOW BUDGET

- With efficiencies developed in design, this unit cost on average \$40,000-\$160,000 CHEAPER than like flow and pressure units.
- Maintenance cost savings with sealess charge pump.
- Unit weighs less than 13k lbs., can be moved with a forklift.
- Unit fits on a car trailer, can fit up to 4 on a semi. Not an oversized load.
- Move it yourself in the field without the cost of a crane or trucking.
- Single feed electrical tie-in.
- 20% I/O Capacity built in. No need for field programming.
- Programming cost included; average savings \$13,000.
